STILL FIDDLING, AT 100 SECONDS TO MIDNIGHT, AS THE WORLD WARMS, FLOODS AND BURNS: OCEANS' SURVIVAL NEED FASTER SITING AND TRANSMISSION OF OFFSHORE WIND FARM PROJECTS

By Morgan Muenster • 23 Mar, 2022

The Black Hills were stolen from the Lakota Sioux over a hundred years ago. Find out how Fourth of July celebrations are threatening the environment and land rights of the Black Hills.

By Vaughn Ford-Plotkin • 23 Mar, 2022

This article is about how the extreme heat in Arizona during the Summer months injures and kills the homeless population. I cover the extreme heat waves that have hit Arizona in the past couple years, with temperatures over 110 degrees Fahrenheit becoming more and more common. Along with the struggles that come with the heat alone, I also discuss the mistreatment of homeless people by Phoenix Police and the added issues that arise as a result. Finally, the article ends with proposed immediate and future mitigation strategies to protect Phoenix's homeless population.
